		Phone: <i>317-736-9246</i>	Zip/postal code: <i>46131</i>
		E-mail: <i>franklinacc@comcast.net</i>	

I hereby certify that the animal examined is the animal described on this application. I understand that only normal results will be released to the public unless the initials of a registered owner appear in the authorization box below which permits the OFA to release abnormal results to the public.

Signature of owner or authorized representative _____

Authorization to Release Abnormal Results

I hereby authorize the OFA to release the results of its evaluation of the animal described on this application to the public if the results are abnormal (initials of registered owner).

Veterinary Instructions

- Clinical findings based on cardiac auscultation is required. (see page 2)
- Auscultation is within normal limits. Additional diagnostic studies not indicated.
 - Auscultation reveals a soft (grade 1 or grade 2) murmur at rest.
 - Auscultation reveals a moderate to loud heart murmur.
 - Auscultation was performed after exercise and revealed:
 - Normal heart sounds without a cardiac murmur.
 - A soft (grade 1 or grade 2) murmur.

Describe any cardiac murmurs:

- Timings: systolic diastolic continuous
- Point of maximal intensity:
- Mitral valve area Aortic or subaortic area
 - Pulmonary valve area Tricuspid valve area
 - Other location: _____
 - Radiation or other characteristics: _____

Echocardiography if indicated (see page 2):

- Echocardiography with Doppler was performed and the results were within limits of normal.
- Echocardiography with Doppler was performed and the results were equivocal: mild congenital heart disease cannot be conclusively diagnosed nor excluded based on this study.
- Echocardiography with Doppler was performed and the results were indicative of congenital heart disease.

Describe any abnormal echocardiographic or Doppler findings, including transvalvular or other pertinent velocities in m/sec.

- pulse/continuous wave left apical/subcostal

Summary evaluation and opinion of the examiner:

- Normal cardiovascular examination—congenital heart disease is not evident
- Equivocal cardiovascular examination—congenital heart disease cannot be diagnosed nor excluded; status uncertain for breeding.
- Abnormal cardiovascular examination indicative of congenital heart disease; indicate diagnosis below: _____

I certify that the standards for cardiac examination as set forth by the OFA were carefully followed in performing this examination.

I DID verify tattoo/microchip on this dog I DID NOT verify tattoo/microchip on this dog

Veterinarian Signature: *[Signature]* Specialty: Practitioner, Specialist, Cardiologist Date: *4-22-07*

- Fees**
- Animals Over 12 Months \$15.00
 - Litter of 3 or more submitted together \$30.00

- Kennel Rate**—Individuals submitted as a group, owned/co-owned by same person.
- Minimum of 5 individuals \$7.50 per study

Payments can be made by check, money order, (U.S. funds drawn on a U.S. bank) cash, Visa, or Mastercard, payable to the Orthopedic Foundation for Animals.

Fees

- Submission fee/individual.....\$15.00
- A litter of 3 or more submitted together.....\$30.00 total
- Kennel rate:** Individuals submitted as a group, owned/co-owned by the same person
- 5 or more individuals.....\$7.50 each

Payments can be made by check, money order (U.S. funds drawn on a U.S. bank), cash, Visa, or MasterCard, payable to the Orthopedic Foundation for Animals.

Visa/MasterCard Number Name on Card Exp Date CVV (security code)

Affected dogs at any age are no charge

Interpretation

*Clear: Your dog is clear of the DNM1 gene mutation highly associated with EIC. This means that your dog has two copies of the normal gene and therefore is highly unlikely to be susceptible to the classic syndrome of EIC. However, this result does not rule out the possibility that your dog could have a collapse condition that is different from the condition most Labrador Retrievers have.
